2FSM Maintenance Check List

Properly maintaining your belt sander will keep it function. Below is a list of items that you will need to do to keep it functioning. These tasks should be performed monthly (depending on usage of the machine).

Check List

- Thoroughly clean sander. We would recommend disassembling the sander to complete procedure.

  This involves blowing with air nozzle or a stiff bristle brush to knock off debris on all moving parts. Below are the moving parts:

  - Upper pulley (936-030)
  - Lower pulley (936-007)
  - Idler shaft (645-008)
  - Tracking collar (123-004)

Sign Off Sheet

We would recommend that you sign and date the sheet ever time the machine is clean.
